## What's New

News changes with each passing hour. All kind of news—fascinating, strange, prophetic, real and unreal. It comes flashing on the pages of your paper from all parts of the world, and you want to know what's new.

Advertising is a form of news. It is governed by the same general principles and answers your every question as to "what's new?" You can depend upon advertising news. It is truthful. If you want something for the home, you will find it advertised. If a dress, a suit of clothes, a hat, a pair of shoes, a diamond ring, a bridge lamp, an electric refrigerator or a house and lot—you'll find it advertised.

Advertisements supply the surest means of knowing "what's new" in merchandise. Learn to read them—trust them—profit by them.

Read the advertisements as regularly as you do the news

## FIRE DESTROYS CROSSFIELD GARAGE TUESDAY AFTERNOON

Loss Was Covered By Insurance, Except One Chevrolet Sedan

### Calgary Fire Brigade Called

On Tuesday afternoon at 2 o'clock fire broke out in the Crossfield garage destroying the entire building and three automobiles and one truck, and the entire stock. The loss is estimated at \$15,000.00 which is covered by a fair amount of insurance.

The fire was first noticed in a pile of gasoline drained from a car being repaired, which had ignited and the flames spread so rapidly that the proprietor and mechanics were unable to do anything to check the flames that destroyed the entire building.

The Calgary fire brigade were given a urgent call and in less than forty minutes a fire truck arrived on the scene and assisted the local volunteer fire brigade to extinguish the blaze.

It was first thought that the Co-operative store would be destroyed, but owing to the speed in which the flames devoured the garage the fire was held in check by the army of workers who did splendid work.

The cars destroyed were owned by the following citizens: G. Williams, Pontiac coach; Ed Spurgeon, Chevrolet sedan; H. Gazeley, Chrysler sedan; P. T. Baker, truck. The cars were valued at \$5000. The building \$7000 and the stock, equipment, etc., made up the estimate \$15,000.

This is the third time that the Crossfield Garage has been burned.

It has not been learned whether it will be rebuilt at this date.

## Crossfield Public and High School Literary Society Organized Here

The Crossfield Public and High School have organized a literary society and hold their meeting once a week in the Masonic Hall.

The officers in charge are:— President—Grace Williams. Vice-President—May Stantler. Secretary—Marjorie Young.

## C. G. I. T. CLUB

The C.G.I.T. held their Friday night meeting at the home of their leader, Mrs. R.M. McCool.

As the group has become too large for one leader, the girls have decided to divide into two groups.

The younger girls from 12 to 15 years will be in a group by themselves' with Miss Gladys Metherell as their leader. Mrs. McCool will continue to lead the older girls.

The officers for the younger groups are:— President—Margaret Fitzpatrick. Vice-President—Verna Pogue. Secretary—Treas.—Jessie Young.

## Floral U. F. W. A. To Meet Wednesday, October 9th

The Floral U. F. W. A. will hold their regular meeting at the home of Mrs. W. D. McCool on Wednesday October 9th, at 2:30 p.m.

The subject for study and discussion is Immigration.

Members are reminded that roll call is, "current events."

## Union Sunday School Give Farewell in Honor of Miss Stella Gordon

The teachers and officers of the Crossfield Union Sunday School held a farewell party on Friday evening, at the home of Mr and Mrs Waldo, in honor of Miss Stella Gordon, one of the primary teachers, who is leaving Crossfield. After the evening programme a delightful lunch was served.

Miss Gordon has been a teacher in the Sunday School for some time and it is with deep regret we see her leave.

## FAREWELL PARTY

Mrs. Arnold High entertained at a bridge party on Wednesday evening in honor of Miss Helen Willis and Miss Stella Gordon who are leaving this district.

The honors at cards went to Mrs. E. Devins and Miss Gordon received the consolation prize. At midnight a dainty lunch was served. The guests included: Misses H. Willis, S. Gordon, M. Young, L. Calhoun, Mrs. A. Stevens, Mrs. L. Nichol, and Mrs. E. Devins.

We hear it's always best to look at the bright side of everything. But which is the bright side of a car upside down in a ditch? —Nelson News.

## NOTICE TO THRESHERMEN

Owners or operators of threshing machines and combined harvesters are required to have their machines registered with the Department of Agriculture and to send the Department at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether the machine is to be used for custom work or only for the owner's crop. Special forms for these returns may be secured from the

PUBLICITY BRANCH

Department of Agriculture, Edmonton.

## Canadian Anomalies

Following the close of the Great War by the signing of the Armistice, Canada demanded and was accorded a place of equality with other nations of the world at the Peace Conference, and, with the creation of the League of Nations, Canada entered that League on exactly the same terms as all other nations. That is to say, Canada was recognized as a nation. And in signing the League Covenant, Canada accepted the responsibilities of a nation.

At the last Imperial Conference, in London, with all the self-governing Dominions of the Empire and the British Government fully represented, a formal declaration was adopted setting forth that Canada and the other self-governing Dominions were fully autonomous nations within the British Commonwealth of Nations, possessing exact equality with Great Britain.

As a logical outcome of these declarations, Canada has established her own legations in certain foreign countries, appointed her own ministers, and, in turn, these countries have named ministers at Ottawa. Thus, as a nation, Canada has direct representation at Washington, Paris and Tokio, in exactly the same manner as any other country. Equally significant is the fact that the British Government has appointed a High Commissioner to Canada, while Canada maintains a High Commissioner in London.

But while Canada is thus recognized as a nation, it is the only nation in the whole world which has no nationality of its own, and no distinctive flag of its own. These are anomalies which other people find it extremely difficult to understand.

In England, people born in that country are recognized and officially listed as English; if born in Scotland, they are listed as Scottish; in Ireland, as Irish; in France, as French; in Germany, as German; in the United States, as American. Born in Canada, on the other hand, a person may be listed as of any nationality under the sun except Canadian. Officially, there is no such person as a Canadian.

The writer of this article was born in Canada as were his father and mother. His mother's parents were both born in Canada. His father's parents were born in Ireland, their ancestors having crossed to the Emerald Isle from Scotland. So the writer becomes, in Canada, an Irishman although neither he nor his parents ever saw Ireland. If his grandfather had been born in Siam, then the writer would be a Siamese.

In the face of such an anomaly, such a ghastly absurdity, it is little wonder that the people of other countries laugh in the face of any person born in Canada who is bold enough to lay claim to his country being a nation.

Every nation in the world, except one, has a distinctive flag of its own. The exception is Canada. Australia, New Zealand, South Africa, Newfoundland, the Irish Free State all have their distinctive national flags, as well as the Union Jack, the flag of all of Great Britain and the Empire, Canada has a distinctive flag for its merchant marine, and by Orders-in-Council it has been decreed that this shipping flag shall be flown over Canadian Government buildings in the British Isles, and in foreign lands, but it is not officially recognized anywhere else.

Thus, while a Canadian may fly a distinctive Canadian flag over a ship owned by him, he may not fly it over his office building or his residence, and while such a flag may be flown over a Canadian Government building in London, Washington, Paris, or Tokio, it cannot be flown over a Canadian Government building in Halifax or Vancouver, or anywhere between these two points.

A person born in Canada is, therefore, that peculiar individual among the peoples of the world who has no nationality he can call his own, and no distinctive flag that he can properly fly in his own land and over his own home and public institutions.

And yet the people of Canada find pride in calling Canada a nation. Why, this so-called nation of Canada has not even the right to amend its own constitution, a power possessed by other self-governing dominions of the British Commonwealth.

Canada is, and is proud to be, and desires to remain, a part of the British Commonwealth of Nations. It is proud of and loyal to the Union Jack as the flag of that great Commonwealth, and will ever retain it. But just as the Dominion has its own Coat of Arms, and each Province its Arms, and each city its Arms, so do the people of Canada desire to establish and retain their own nationality, have their own distinctive flag, and enjoy full autonomy in their domestic affairs.

Much as a native born Canadian may love England, or Scotland, or Australia, or New Zealand, he does not desire to merge his identity or lose his individuality. He is a Canadian and desires to be known as such, not as an Englishman, a Scotsman, an Australian or a New Zealander.

If Canada is a nation, let it display the qualities and the insignia of a nation.

## Student Aviator Gets Thrill

Fell Out of 'Plane But Fortunately  
Had Parachute

Arthur Center, automobile dealer and student aviator, of Springfield, Mass., experienced an unexpected thrill when he fell out of his 'plane while flying 1,800 feet over Springfield airport.

Center, who was flying without a safety belt, but who had a parachute, pulled the cord of his parachute and made a landing unhurt. The 'plane fell in an open field and was demolished.

School Teacher: "If a farmer has 14,000 pecks of potatoes, and he sells them for 20 cents a peck, what will he get?"

Small Boy: "A set of golf clubs, a radio and a town car."

## Rheumatism

**MINARD'S**  
"KING OF PAIN"  
LINIMENT

## Reconstructing a Liner

Timber From Many Countries Used  
On Palatial Steamer

Timber of many forests in many countries has been used for reconstruction and redecoration during the seven weeks' overhaul of the White Star liner "Majestic," which recently left Southampton for New York, on her one hundredth west-bound crossing. The varieties of wood included oak, mahogany, teak, beech, ash, satinwood, walnut, Oregon yellow and pitch pine, deal. Forty-four tons of paint was used on interior and exterior work, whilst 18,000 yards of electric wire was used in wiring electric bells and electric lights in cabins of tourist third cabin accommodation.

## Women Are Excluded

By the Ironclad rule of a woman, no woman has ever entered the gigantic Krupp plant except the former kaiser's daughter. The regulation was laid down by Frau Margarethe Krupp, for years chief director, and continued in force by her daughter, the present owner, Frau Bertha Krupp von Bodelin and Halbach.

Five hundred years before the birth of Christ, Hippocrates, a Greek, wrote a book on medical science which is still studied by students in America and Europe.

## All Weather Road Promised

From International Boundary To Prince Albert National Park  
An all-weather highway from Regina or the boundary to Prince Albert National Park will probably be put into condition, F. R. MacMillan, of Saskatoon, president of the Saskatchewan Conservative Association, told members of the Kiwanis Club at Prince Albert. He thought that this should be the policy of the government, and the fact that a cabinet minister in the Anderson Government, H. J. A. Merkle, was on a trip to the park was an evidence of the government's interest.

## HEALTH REGAINED

Mother and Daughters Restored  
Through the Use of Dr.  
Williams' Pink Pills

"Contrary to what my friends once thought, I am still living," says Mrs. Norman White, New Canada, N.S., and I live the credit to Dr. Williams' Pink Pills. I had been a sufferer for some years. I was weak and run-down; my heart would palpitate violently at the least exertion. I grew so weak that I could not do my housework. I was under a doctor's care, but it did not benefit me. A second doctor was called in, but with no better results. My friends told me that I was almost bloodless, and I became so weak I was forced to remain in bed. My friends did not believe I could recover. While in this condition a neighbor strongly urged me to try Dr. Williams' Pink Pills. It was like grasping at a straw, but six boxes of this medicine were got for me and by the time I had taken them I was able to sit up. Another six boxes were got and soon I was able to get about, my health improving. I continued the use of the pills until I felt my health fully restored. I still take the pills occasionally as a safeguard. My two daughters have also used the pills with the most beneficial results. The trouble in both cases was the anemia that so often comes when girls are entering womanhood. Under the use of this medicine both fully regained health, strength and activity. You can see, therefore, that it is impossible for me to praise Dr. Williams' Pink Pills too highly, and I hope every weak person who may read this will benefit by my experience. You can get these pills from any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## Escape From Submarine

Men Leave Submerged Craft In  
Record Time During Experiment

Ten men emerged from the sunken submarine T-17 in forty-eight seconds during a submarine experiment in Italy, making what is called a world record for men leaving a sunken submarine.

Half of the participants used head pieces, while the others were not especially equipped. The submarine, carried a new device consisting of a large bowl beneath a torpedo tube permitting the men to leave the submarine without water entering the hull.

A Household Medicine.—They that are acquainted with the healing properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

## What's In a Name?

An Englishman's home is his castle, but whether he is able to call his castle what he likes is a matter of some doubt. The thought arises because the Bank of England officers have decreed that the words "Bank of England" on a building in Burnley must be removed. The words, carved in bold letters in stone, have adorned this building for over a hundred years. Why are there on one knows.

## Her Little Boy Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lebert, Sask., writes:—"For over a month, last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended—

"Discouraged and in despair I sent for a bottle, not expecting any more benefit than from the many other medicines I had used, but to my surprise I noticed a change after he had taken a few doses, and before the bottle was half used he was the same happy, healthy boy he was before he took sick." Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1805

## Wheat Grading High

Quality Year in Wheat Production

This year is a quality year in wheat production in Saskatchewan. Seventeen cars of No. 1 hard wheat have already been received by the flour mills at Saskatoon. In each of the years, 1927 and 1928, there was just one car of No. 1 hard wheat produced in western Canada.

The wheat graded by the Dominion grain inspector at Saskatoon up to the present time shows a very high proportion of the high grades, as follows:

No. 1 hard, 6 per cent.; No. 1 northern, 51 per cent.; No. 2, 30 per cent.; No. 3, 4 per cent.

A part of the No. 2 is Garnet wheat to which the No. 1 grade is not given.

At the Moose Jaw inspection point 50 per cent. of the wheat is No. 1, 35 per cent. No. 2, and the balance mostly No. 3. A. McPherson, of the Dominion grain branch, reports.

This year northern Saskatchewan is producing wheat of equal quality to that grown in the southern part of the province. This is held to be unusual as excess moisture during the growing season in most years makes the northern wheat starchy. The Elrose line is producing a high percentage of No. 1 hard, Hughton and Elrose being outstanding shipping points.

## Interested in Peace Garden

Financial Support Promised . By  
Industrial Concerns In U.S.  
and Canada

Interest is developing in a project of horticulturists of Canada and the United States that an International Peace Garden be established at some point along the boundary between the two countries. The idea has brought expressions of approval from the Governor-General of Canada and Hon. William Phillips, the United States ambassador to the Dominion, as well as from several Canadian politicians of cabinet rank. The heads of many large industrial concerns on both sides of the boundary have promised financial support, and a considerable sum is in view as a nucleus of endowment for the garden.

Certain it is that a garden of the sort proposed would be a beautiful and fragrant memorial to the well more than a century of peace between Canada and her neighbor, and also an impressive pledge of goodwill. Its spiritual value at all times would depend upon the degree to which it was a symbol of cordial feelings actually entertained by the peoples of the two countries towards one another and as carried into practice by them. — Regina Daily Post.

## Romanian Scientist

Designs "Space Rocket"

Hopes To Carry Mail To America In Thirty Minutes

A "space rocket," designed to shoot upward for 32 miles, and it is hoped, be the forerunner of a rocket that will carry mail to America in 30 minutes, is to be built at once, it has been learned.

Prof. Hermann Oberth, a Rumanian scientist, designed the rocket. It will be built under the supervision of the U.F.A. Film Company. Its object, for the first flight, is to measure the physical and chemical properties of the atmosphere. Instruments will be enclosed in this end.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

## Winnipeg Heads List

Aviation Club Has Record Of Over  
Thousand Hours In Air

The rapid growth of air-mindedness in Canada is indicated by the fact that members of clubs in Canada have flown more than 10,000 hours during the first eight and a half months of the year.

The Winnipeg club heads the list with well over 1,000 hours in the air; Toronto comes second with about 1,000 hours, and Ottawa third with just over 900 hours.

One hundred and ninety-two new private, and 57 commercial pilots have graduated from the ranks of the students in the clubs. In 1928 the figures at the end of the year showed 111 private pilots and 28 commercial.

This year there are 22 clubs in actual operation as against 15 last year.

Old Dobbin had one good point. Nobody brought out a new model about the time you got him paid for.

A Reliable Antiseptic—Minard's Liniment.

## From Youth To Old Age

THERE are three trying periods in a woman's life: when the girl matures to womanhood; when a woman gives birth to her first child; when a woman reaches middle age. At these critical times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor. Countless thousands testify to its worth.

## Lydia E. Pinkham's Vegetable Compound

LYDIA E. PINKHAM MEDICINE CO., Lynn, Mass., U.S.A.  
and  
Colony, Ontario, Canada

## Artificial Silk From Acetic Acid

Combined With Cellulose Will Make  
Fabrics As Predicted

Prediction that the sour taste in vinegar will be used to make artificial silk was made to the United States Chemical Society today by Professor D. B. Keyes, of the University of Illinois. The sour substance with which chemistry's magnetic touch may make finer dresses was called by Prof. Keyes by its scientific name, acetic acid. He told of a newly-developed process at Illinois for making it, developed in co-operation with E. P. King and Sherbrook Swanne, of the university. For making artificial silk it is combined with cellulose to form cellulose acetate.

## Externally Or Internally, It Is Good.—When Applied Externally by Brisk Rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Internally it is a powerful stimulant, and internally it will still still the irritation in the throat which induces coughing and will re- lieve inflammation of the bronchial tubes and respiratory organs. Try it and be convinced.

## Makes Ninety Miles An Hour

Moth 'Plane Purchased By Prince Is  
"Pure British"

The Prince of Wales made his first flight as owner of an airplane, to see his father at Sandringham. It is a G. H. Gypsy Moth, price only \$3,300. The Prince would buy anything not "pure British." The little Moth makes 90 miles an hour, is painted bright red and blue and carries a silver plate marked "H.R.H. The Prince of Wales." The little machine with aluminum nose is upholstered in scarlet leather which can be inflated to avoid bumps.

## World's Grain Show

National Committee Will Meet In  
Toronto In November

Hon. W. R. Motherwell, Minister of Agriculture, is calling a second meeting of the national committee of the world's grain conference and exhibition. The meeting will be held in Toronto on November 21. Considerable work has been accomplished in preparing for the world conference which will be held in Regina in 1932. The tentative prize lists will soon be ready and will be so arranged that every province will have good chances in some of the classes. As soon as the lists are completed copies of them will be sent to all foreign countries with invitations to compete.

## Would Broadcast Trials

The broadcasting of trials in Berlin courtrooms was being contemplated, says a report from the German capital. It was declared there were no legal objections to such procedure, since all trials are public, and that if inaugurated it would be a novelty which soon would be copied throughout the world.

## RUSSIAN GRAIN WILL NOT AFFECT CANADA'S TRADE

Ottawa.—Canada's wheat trade would not be imperilled by a resumption of trade relations with Russia by the Labor Government in Great Britain for some years at least, Right Hon. L. C. M. S. Amery, secretary of state for the dominions in Baldwin cabinet, said on his arrival here.

"In the present disorganized condition of Russia under the Bolshevik regime, it is highly improbable," Mr. Amery said, "that there will be surplus wheat to export for some years to come. The Russian farmer is probably only raising enough for his own needs." Accordingly Russian wheat would not constitute a competitive factor in the British market. Just how imminent was the possibility of a resumption of trade relations between Great Britain and Russia, Mr. Amery could not say.

## Grant Priority To

### Dominion Taxes

Provincial Claim In Bankruptcy Is Second Says Supreme Court

Ottawa, Ont.—The Supreme Court of Canada, in a judgment handed down, held that claims for Dominion taxes had priority over claims for provincial taxes. The appeal was taken on behalf of the attorney-general of Canada and opposed on behalf of the attorney-general of Quebec.

The action arose out of a bankruptcy matter. Both the Dominion Government and the Quebec authorities had a claim against the bankrupt for taxes. There was not sufficient to pay both claims in full. It then became a question as to which claim took priority.

The trustee in bankruptcy, in his dividend sheet, gave priority to the claim of the Dominion and in that he was sustained by the trial judge, Mr. Justice Panneton. The court of King's Bench held, Mr. Justice Guerin dissenting, that both claims should rank concurrently. From that decision the Dominion appealed to the Supreme Court of Canada.

## New Zealand Showing More British Pictures

Quota Has Been Set By Regulations Of Government

Wellington, New Zealand.—A greater proportion of British moving pictures will be shown in New Zealand in the future, according to new government regulations. From October 1, exhibitors will be required to screen a fixed quota of British films. The government says it has been assured ample supply of both the talking and silent films from British studios will be available during the coming year.

## Grain Stored At Vancouver

Statement Shows Over Seven Million Bushels In Elevators

Vancouver.—Grain in storage in Vancouver elevators has reached a total of 7,285,000 bushels, a figure more than five times greater than the corresponding one for 1928, according to a statement issued by the merchants' exchange.

Ships bookings for wheat, already will be removed during the month of made, now that 1,026,933 bushels October, however.

**Famous Film Missing**  
London, Eng.—It has been announced that the famous war film, "The Battle of the Somme," is missing. The film is the property of Dr. Gustin Muddock, who, as an army staff photographer, was in charge of it. It was while he was ill that the picture was removed for safety and now it cannot be discovered. The film was one of the most historic in the world.

**Favors Canadian Flag**

Nanaimo, B.C.—After debating for more than an hour, whether or not Canada had a distinct national flag of its own, the British Columbia School Trustees' Association decided that she had not, and that the proper authorities should be informed that the association favored a distinctive emblem.

There are only about 40,000 Eskimos in the entire Arctic.

The United States now has more than 100 million of lighted airways.

W. N. U. 1800

## Will Start In December

Preparations Almost Completed For Western Air Mail Service

Ottawa, Ont.—The western air mail service will be inaugurated early in December and the tentative date for the first flight has been set for the second week of the month.

This announcement follows the statement of the Department of National Defence that the radio and light beacon and the emergency landing fields will be installed and ready for use by December 1. The Post Office department is fully prepared to put on the service at that date, and the Western Canada Airways, it is understood, have completed preparation and should begin the flying end of the service on short notice.

The bi-weekly air mail service from Edmonton north along the Mackenzie river will begin earlier than the main service across the prairie provinces. This northerly service will commence as soon as the winter season sets in and the planes can use skis with safety.

## New Airway Mapped

London To Capetown Will Be Longest In World

London, England.—The longest airway in the world—an 8,000-mile route from London to the Cape—is to be inaugurated by the Imperial Airways early next year.

As a result of the great 20,000-mile aerial survey of Africa, made by Sir Alan and Lady Cobham in their big Short Rolls-Royce flying boat, a route through the heart of tropical Africa, passing over deserts and jungles, has been mapped out.

Agreements have been made with the various governments concerned for supporting the air line, and preparations are now being completed for its opening. Passengers and mails will leave London every Saturday in a giant triple-engine Armstrong-Siddeley air liner, and will arrive in Capetown nine days later, having flown by a combination of big air liners and all-metal flying boats.

## Reparations Bank

### Shunned By League

Committee Withdraws Resolution To Establish Intimate Connection

The League of Nations will not seek, for the present, to establish close relationship between itself and the international reparations bank provided by the Young plan.

This became clear when a resolution envisaging the establishment of an intimate connection between the bank and the League was withdrawn from consideration in the Assembly's committee that deals with economic questions.

But its authors, Norway and Denmark, in withdrawing are believed to have gained credit for their purpose. Their move was interpreted in some quarters as a signal by the countries not concerned directly with reparations payments that they will not be greatly pleased if the proposed bank should become too dominant a function in the economic life of Europe.

## Discuss Coal Prices

English Mine Owners Consider Question For Canadian Trade

London, Eng.—A dozen large coal mine operators from various parts of the country met Rt. Hon. J. H. Thomas, at the treasury, to discuss the question of prices of coal for the Canadian trade. The minister for employment who has just returned from Canada pointed out the great possibilities of the Dominion for British exporters. It was stated the deputation was not officially representing the mining association of Great Britain, but it was noticed that Evan Williams, chairman of the association and W. Lee, its secretary, were among those present. No statement was issued immediately.

## Degles Dirigibles Are Obsolete

London, England.—Emphatic denials of the statements in London newspapers that the dirigibles now under construction for the British Government—the R-100 and the R-101—were obsolete, was made by Commander Sir Charles Burney, head of the Airship Guarantee Company which is building the R-100.

## Birds Lured To Death

Toronto.—Lured by the brilliance of the beacon at Long Point, on Lake Erie, near Port Rowan, more than 800 song birds migrating to warmer climes for the winter, met death recently flying through a fog the birds were attracted by the bright light and dashed to death against the walls of the lighthouse.

## Issue Interesting Report

Grain Commissioners Publish Baking Tests Of 1929 Flour

Winnipeg.—Low weight per bushel, lower flour yield, higher protein content; lower water absorption of the flour and excellent baking quality are features of a preliminary report on the milling and baking characteristics of western Canada's 1929 wheat crop, issued by Dr. F. J. Birchard, chief chemist to the Board of Grain Commissioners for Canada, and his assistant, T. R. Allen.

Milling and baking tests conducted at the Dominion Grain Research Laboratory, in Winnipeg, indicate that, on the whole, the milling yield is inferior, but the baking quality, grade for grade, is fully equal to if not superior to that of last year, states Dr. Birchard, in the report. The effect of frost and immaturity is not a serious consideration as was the case last year; practically all the wheat is sound and mature, but each grade contains an increasing number of undeveloped kernels and consequently the weight per measured bushel would appear to be the chief factor in determining the grade.

## LABOR PARTY IN ONTARIO HAS ENTERED LISTS

Toronto.—The Ontario Labor party officially entered the lists for the coming election when it issued as the first step of its campaign, a manifesto giving the following by way of a minimum program:

Unemployment insurance.

Extension of the public ownership principle.

A law to permit the election of police commissioners.

A liquor referendum.

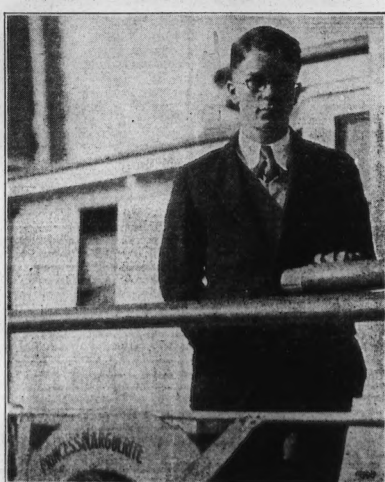

Compulsory public liability automobiles insurance.

Amendments to the Old Age Pension and Mothers' Allowance Acts.

G. Howard Ferguson, leader of the Conservative party, for bringing on an election "long before it was necessary to appeal to the country. Posing as an advocate of responsible government he has not thought fit to use the British method where the Premier announces on the floor of Parliament before the elected representatives of the nation that on a certain date an election will be held."

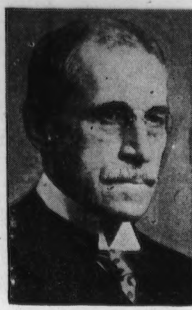

The Labor party has always stood for the discussion of the liquor problem free from party politics, says the manifesto. "It recognizes that the solution of the problem lies in the taking of the manufacture of liquor away from private capitalists. If there is to be government control, it must not only be control of the retail sale of liquor but also of its manufacture. It is therefore of the opinion that in a question like the liquor issue, where centuries of prejudice exist on both sides, that the question should be submitted to the people in the form of a referendum."

## Edison's Pupil Visits Canada

Walter Huston, Seattle boy who won the special prize donated by Robert Edison, for research and inventive potentialities, was a visitor to Canada recently, when he took Canadian Pacific coast steamship "Princess Margaret" in a round trip from his home city to Victoria and Vancouver. Huston who is likely to become a second Edison, will devote his life to scientific research, he says, following the example of his famous friend and mentor.

## CHAIRMAN OF ROYAL COMMISSION

Philip D. Ross, proprietor of the Ottawa Citizen, has been appointed chairman of the royal commission, announced by Premier Ferguson, which will study the welfare needs of the province.

## Will Remain In Canada

No Truth In Rumor That Sir Henry Thornton Was Leaving

Ottawa.—Sir Henry Thornton will remain in Canada as president of the Canadian National Railways. Any doubt on this point was settled by Premier Mackenzie King, following a recent meeting of the cabinet. In the absence of Hon. C. A. Dunning, minister of railways, who is in the West, the Prime Minister was unable to say whether or not a renewal of Sir Henry Thornton's contract with the government had been signed.

There was no question, however, about Sir Henry remaining in Canada, the prime minister said.

Recently there have been rumors that the president of the Canadian National might go to England.

## Ban Religious Holidays

Soviets Dispute With All Religious Holidays, Including Sundays

Moscow.—All religious holidays, including Sundays, are abolished under the new 24 hour system of labor introduced throughout the Soviet Union. Workers are given one day of rest every five days.

The only holidays not abolished are October 25, anniversary of the October revolution; January 9, anniversary of Lenin's death, and May 1st and 2nd, international days of labor celebrations.

## Tariff Board Application

Ottawa.—Initiation of investigations based on ten or more new applications will feature the first full sittings of the tariff advisory board which will open on Tuesday, October 29. Chinaware, glassware, linoleums and wall papers are among the commodities that will come under review at the hearings, which will extend over two weeks.

## Colony For Doukhobors

Two Hundred and Fifty Members Of Sect Transferred From Jail To Colony In B.C.

Nelson, B.C.—Some 250 Doukhobor men, women and children who have been confined to the provincial jail here, were transported by the provincial police to Porto Rico.

Porto Rico is a former Christian community lumber camp which is situated some 15 miles south of Nelson. Last Friday when these Sons of Freedom were camping on the outskirts of the city, Peter Veregin offered this old camp site to the Doukhobors as a permanent habitat.

Starting early in the morning trucks and buses carried loads of prisoners from the jail to Porto Rico until 4 p.m., when all the Doukhobors had been safely landed. Each bus in addition to the prisoners, carried a couple of deputies to preserve order if necessary. This measure was not necessary.

When all had arrived at the camp it was noticeable that many of the Doukhobors directly started to pick out living quarters from among the camp buildings. This measure was not necessary.

The majority of the buildings at the camp are windowless and doorless, and the more industrious of the Doukhobors began to repair their future homes protect them against the cold nights that are setting in.

## Balloon Found Unmanned

Believed To Be One Piloted By French Flier

Paris.—A tragedy of the air was indicated as a balloon without passengers floated to the ground near Kamenice, Jugo-Slavia.

The Aero Club of France was advised the balloon carried the club's flag, and that blood spots were found on the torn basket. An altimeter registering 5,000 meters (about 19,000 feet) was found by peasants nearby.

It was believed the balloon was the one in which Pilot Nuger left St. Cloud, near Paris, to compete in the Aumont Thierville Cup race. The place where the bag was found is 550 miles from Paris.

## Convicted Of Manslaughter

Mrs. Pantages, Wife Of Theatrical Magnate, Found Guilty By Jury

Los Angeles.—Mrs. Lola Pantages, wife of the theatrical magnate, was convicted of manslaughter by a jury which heard her trial on a charge of second degree murder.

The jury of five women and seven men made no recommendation for leniency. The sentence for manslaughter is fixed by California law at from one to 10 years in the penitentiary.

Mrs. Pantages was charged following the death of a Japanese gardener, killed when their automobiles collided last June.

## GRAIN EMBARGO IS REQUIRED TO EASE CONGESTION

Winnipeg.—Serious congestion in the lake head's mammoth grain elevators brought suggestions that the placing of an embargo on western grain shipments appeared to be the only remedy to the situation.

Port William and Port Arthur terminal elevators, with a storage capacity of 86,000,000 bushels today are housing practically 70,000,000 bushels, leaving a comparatively small storage space through which to move the incoming crop.

Lack of demand for Canadian grain in the world markets and the resulting congestion at Montreal, is responsible for the situation at the head of the lakes, and railway authorities here intimated that the placing of an embargo probably will be necessary.

E. B. Ramsay, chairman of the board of grain commissioners, commenting on the situation, said an embargo seemed to be the only remedy.

A similar situation arises every fall, pointed out the grain board chairman. He indicated however, that last year at this time the shortage of cars to handle the heavy prairie crop had itself acted in the nature of an embargo, preventing progress of grain to the lake head. This season, with sufficient cars available to move the wheat east of Port Arthur and Port William elevators are reported plugged almost to capacity, while harbor conditions do not point to an early rush east of lake boats.

## NON-PREFERRED ENTRY RECEIVES FURTHER CUT

Ottawa.—The number of farm laborers which transportation companies will be permitted to bring into Canada from non-preferred countries of Europe will for next year be further reduced by 25 per cent. The present provisions to encourage emigration from the British Isles will be continued including the two pound assisted passages.

Representatives of the Canadian Pacific Railway and steamships, the Canadian National, the Hudson's Bay Company, and several ocean shipping companies recently spent a day in conference with Hon. Robert Furber and officials of the Immigration Department, laying plans for next year's movement. Although the transportation companies had hoped for greater scope in bringing out farm laborers, the decision of the minister seemed to have been fairly acceptable.

A year ago in order to reduce the influx of immigrants from Central Europe the number of farm laborers which were allowed from non-preferred countries was limited to one-third the previous year's total. This resulted in 10,000 less entering Canada. While the restriction was even greater than this year, the requirement that the movement be completed by May 31 is not so far being continued. And there is also more room for them in getting located on the land.

At the conclusion of the conference the following statement was issued by the department:

"It was agreed that British immigration will continue to receive every possible encouragement. A renewal of the assisted passage agreement for certain classes of British migrants, which expires at the end of the present calendar year, was recommended. Free classes include families for land settlement, houseworkers, and juvenile immigrants moved under provincial government or recognized societies auspices.

## No Canadian Race

But Bureau Of Statistics Accepts "Nationality-Canadian"

Ottawa.—There is a Canadian nationality but no Canadian race, and any government form filled with nationality as "Canadian" is accepted, it was announced at the Dominion Bureau of Statistics.

Complaint was made in Toronto of a father who three times entered his child as Canadian and the form was returned, Ottawa being blamed. It is pointed out that the vital statistics forms are made to the provincial authorities and not to Ottawa.

If the form was returned because the new baby was termed Canadian, it must have been returned by the provincial authorities. The Bureau of Statistics accepts "Nationality-Canadian," but also seeks racial origin, which has nothing to do with nationality.

## Exhibiting Canadian Pictures

Ottawa.—Four pictures from the National Gallery of Canada will be sent to London shortly as the Dominion's contribution to the exhibition of Italian art, which will be held at the Royal Academy early next year. The exhibition is to be one of the most comprehensive ever held, embracing Italian art from the 12th century to the present day.

## Prince Appoints Air Pilot

London.—E. H. Fielden, of the air force officers' reserve corps, has been chosen personal air pilot to His Royal Highness, the Prince of Wales. In his new post, Fielden will fly the plane owned by the Prince. This is the first time a member of the royal family has had an air pilot attached to his establishment.

## Manitoba Has Large Surplus

Winnipeg.—A surplus of \$2,005,062 for the fiscal year ended April 30, 1929, was announced by the provincial government through Hon. W. F. Major, attorney-general, in the absence of Premier Bracken, who holds the portfolio of provincial treasurer.

## Adjourns Tenth Session

Geneva.—The assembly of the League of Nations on September 25 adjourned its tenth annual session, which delegates from more than fifty nations hailed as the most constructive and progressive during the ten years of existence of the league.

## Millions In Waste

**Ford Plants Save Everything From Hammonds To Blotting Paper**

Some most unusual items find their way into the revenue-producing scrap heaps at the plants of the Ford Motor Company.

Among these items are a carload of blotting paper each week, sale of scrap iron and a huge amount of coke. Sale of scrap of all kinds last year netted the company \$273,877.60. This figure represents only scrap that was sold; vast quantities in addition were salvaged and converted into use by the company.

Next to the sale of coke, the largest single item in revenue-producing by-products is scrap metal. Twenty-eight freight cars on an average pull out of the plants each day loaded with metal shavings and trimmings—about 600 tons. More than half of this represents trimmings from machine shops and is sold to outside mills for conversion into new metal.

The rest of the metal scrap is of the type worked entirely in open-hearth furnaces and a considerable volume of such waste never leaves the Ford plant, being converted there for further use.

The blotting paper is salvaged after use as a cushion between plates of glass. It loses none of its value as blotting paper and is resold.

Silver is recovered from salts used in the photographic department; diamonds are salvaged from hard cutting tools, and not the least are the left-overs from the wood upholstery. This latter waste is sold to an optical firm to be made into portholes for eyeglasses.

## Established Penny Post

**Sir Rowland Hill Recommended Low Rate In 1837**

A little over fifty years ago Sir Rowland was presented with the freedom of the City of London as a tardy acknowledgment of the great service he rendered in the establishment of a penny post. It was in 1837 that Hill published his famous pamphlet recommending that within the United Kingdom the rate for letters not exceeding half an ounce in weight should be one penny. The use of postage-stamps was mentioned almost diffidently, for Hill wrote: "Perhaps the difficulties might be obviated by using a bit of paper just large enough to bear the stamp and covered at the back with a glutinous wax which, by applying moisture, might be attached to the back of the letter." The Act empowering the penny post received the Royal Assent in 1839.

## Marquis Likes Harvesting

**Heir Of Duke Of Montrose Spends Summers On Canadian Farm**

A scion of a titled house with a liking for work in the Marquis of Graham, older son and heir of the Duke of Montrose. While other young men are sun-bathing at Deauville and on the Lido, he comes to Canada to act as a harvester. This is the second year in succession in which for several weeks Lord Graham has elected to put in work on a Canadian farm. He is a nice-looking fresh-faced man of 22, and good at most games.

Pat (to tourist): "We have great athletes in Ireland."

Tourist: "Why, our champion ran 15 miles and then jumped a nine-bar gate."

Pat: "Oh, that's nothing when you think of the run he had at it."

"Das ye ken that your hens come over into ma garden?"

"I thought they must be daisies."

"Whit maks ye think sae?"

"Because they never come back."

The average weight of a head of hair is from five to twelve ounces.

Wife: "Please come and help. I can't get the trunk closed alone."  
Lustige Sache, Leipzig.

W. N. U. 1895

## Marking Pigs For Identification

**The Use Of Metal Tags Is The Most Common Practice**

Where hogs are bred in large herds it is necessary to follow some sort of marking for identification. One method which is followed by some is that of sticking the ears, pigs in each litter being marked on a similar part of their ears. By means of various combinations of marks quite a large number of different litters are marked, and subsequently identified. This method is faulty in that the ears may be torn and the marks destroyed. It has another weakness in that it does not serve to identify the individual pigs within the litter. The use of metal tags is a general practice on some hog farms. These are stamped with combinations of letters or figures, and as each tag has a different combination a ready means of identification is assured. The most satisfactory type is that which is self-cleaning, and when inserted in the ear remains there permanently unless torn out. When this happens, which is but rarely, a duplicate may be inserted. In order to avoid confusion the tag should be inserted in the ear at or before weaning time.

The Dominion Animal Husbandman, who has a wide experience in marking hogs for identification, calls attention in his report for 1928, published by the Department of Agriculture, at Ottawa, to the use of the tattoo in marking swine, officially recognized by the National Pig Breeders' Association of Great Britain. This method of marking is undergoing tests at the Experimental Farms with the object of determining its value as a means of identifying swine.

## Suggested Economic Parley

**Other Dominions Asked Some Time Ago To Meet At Ottawa**

Premier Mackenzie King has suggested that Canada some time ago suggested to the other Governments of the British Empire that an economic conference be held at Ottawa this year. It was not found possible, however, to arrange for the holding of a conference so soon.

In making these statements the Prime Minister pointed out that Canada would welcome an economic conference in the Dominion. "It is exactly what we would wish," said Mr. King. On the other hand, it was the desire of the Dominion to suit the convenience of all parts of the Empire, and if the general feeling was that the conference should be in London, England, Canada would be prepared to acquiesce. The Prime Minister said that there would probably be an economic conference either here or elsewhere, next year.

## Work Horses Shipped East

**Saskatchewan Horses Are Shipped To Lindsay, Ontario**

Under the auspices of the Saskatchewan Live Stock Pool, and the Provincial Government, an inaugural shipment of carefully selected work horses was made from Maple Creek the other day to the order received by W. Valdes, Markets Commissioner, from the F. J. Cawley Lumber Company, Lindsay, Ontario. These horses are required for bush work and are young, upstanding, heavy-weighted teams, and were inspected by Dr. M. P. McCollan, Veterinary Officer of the Provincial Department of Agriculture. A co-operative horse marketing organization for Saskatchewan has been a long felt want and the need has now been supplied by the formation of a horse marketing division of the Saskatchewan Live Stock Pool, supported by the Provincial and Dominion Departments of Agriculture.

## All The Same To Him

His wife had gone to visit her mother, and had telephoned that she would not be returning until the morning.

When she got home, she said to her husband: "You managed to find something to eat last night, didn't you, dear?"

"Oh, yes," he replied cheerily. "I had the steak that was in the pantry and fried it with some onions that I found in the cellar."

"Onions!" she gasped. "Darling, you've eaten my flower bulbs!"

The fishbender: "Yes, sir, those socks will give perfect satisfaction. I've worn them myself for the last two months."

The customer: "Have you a pair like them that you haven't worn so long?"

"Hans, did you hear the step-ladder fall?"

"Yes, mummy."

"I hope daddy hasn't fallen."

"Not yet—he is still hanging by his waistcoat to the picture hook."

## Keeps Lonesy Vigil

**Secretary Of Amalgamated Civil Servants' Company Only Member At Yearly Meeting**

Every year on August Bank Holiday (the first Monday in August) the secretary of the Amalgamated Civil Servants' Company, in Hamiltonshire, keeps a lonesy vigil at Cutlers' Hall, where he arranges a meeting for members of the company who he knows will never come, and never have come on this particular date.

An old Act of Parliament, passed as part of a charter of the Cutlers' Company, says that a meeting of the company shall be held on the first Monday in August every year, between the hour of 1 p.m. and 3 p.m., to elect 21 assistants to the company.

In these days no meeting is held, but to comply with the statutory requirements, provision has to be made for a gathering at Cutlers' Hall. The presence of at least 40 members would be necessary if a meeting took place, for this number is needed to form a quorum. If the act of Parliament were to be altered to avoid the necessity of the secretary attending, it would cost about \$4,000 in legal fees and other charges, and so from one o'clock to three o'clock, the secretary sits and waits the errant members who are probably enjoying their holidays.

## Menace To Garden Corn

**Worm Destroying Kernels When Cob Near Cooking Stage**

Since the European corn-borer has been doing damage to corn fields in Canada it has often been confused with another worm, particularly in garden corn, says a Federal Department of Agriculture bulletin. The corn-eater, unlike the corn-borer, works in the ear, eating out the kernels of the cob when at the cooking stage. The caterpillar of the corn ear worm when mature is from 1 1/4 to 1 1/2 inches in length. It varies in color from light green to dark brown with rather indistinct stripes on the back and a white and inconspicuous pale colored band along the side. Its description is given in Bulletin No. 112 of the Department of Agriculture, at Ottawa, by Arthur Gibson, the Dominion Entomologist, and C. R. Twinn, an officer of the Entomological Branch. It attacks the ears of garden corn, feeding on the kernels, particularly those near the tassel. Some years the insect is quite abundant and, according to these authorities, at such times it also may be found boring in the fruit of the tomato.

## A Luxury Already

What with airplanes attaining a speed of 320 miles an hour and automobiles whizzing along at sixty and seventy, motorboats skimming the waves like a flash of light, how long it is going to be before a nice quiet stroll is going to be a luxury?

There is no room for trouble in an air castle.

## Amalgamated Civil Servants

Here is Fred Knowles, secretary of the Amalgamated Civil Servants of Canada. He is one of the organizers of the body and obtained leave of absence from his job as letter carrier in Vancouver to take over his present job in Ottawa.

## A One-Man Newspaper

**"Star" Of "The Star" At White Horse, Yukon, Is Kept Busy**

Mussolini may hold seven or eight cabinet offices in Italy, but he has more than a rival in J. D. Skinner, of White Horse, Yukon Territory. For he is porter, reporter, advertising department, composing room, mailing room, publisher and financier of the White Horse Star. He thinks he says, that his is the only one-man newspaper published in Canada. There may be others there and elsewhere, but a glance at the issue of July 19, shows a publication free from typographical errors, well edited, and illustrated with various factors in the news, and not the least of which is a photograph of Mr. Skinner himself.

The "staff" of the Star, as revealed by his photograph, shows no signs of the wear and tear which might be expected. Yet, in addition to general news, his July 19 edition contains seven or eight columns of "personal," and all country editors know how much work it takes to compile these. All the overworked who may hear of the gallant Mr. Skinner will wish him health and success and look forward to an early day when from the list he gives of his duties, he may at least strike off the one of sweeping out the Star office.

## Lightening The Load

If Canada continues as in the past, fiscal year, to devote \$186,392,025 to interest and debt redemption, this country will be free from debt in twenty-five years. Every year the dead weight of interest lightens, having decreased \$23,000,000 since 1921, when the maximum was \$139,531,520 for that year.

The secret of success lies in the man and not in the stuff he works on.

## Glee From Sweet Potatoes

**Commercial Production For Use On Starches To Be Underaken**

A new item looms on the horizon of personal liberty—the privilege of licking stamps that suit the individual taste.

Scientists in the bureau of chemistry and soils have discovered that a high quality starch is obtainable from sweet potatoes. From the starch they have produced dextrin of pleasant taste. They are testing its suitability as glue for stationery and stamps.

All that is left to do is to develop a method of economical commercial production. It is to be undertaken this fall, when the sweet potato crop is harvested. Unofficially, it is believed dextrin can be made from sweet potatoes as cheaply as from tapioca, the present source of most stamp and stationery glue.

If it can, and manufacturers are able to pay enough for sweet potatoes to make it worth the producer's time to market culs, solution has been found for the tremendous waste that has forced many farmers to quit raising them.

It is estimated that about 20 per cent. of the country's average production of 80,000,000 bushels is culs, heretofore suitable only as feed for cattle and hogs.

Six pounds of sweet potatoes, says Dr. W. W. Skinner, assistant chief of the bureau's chemical and technological research, makes one pound of starch. At that rate he estimates a market for 870,000,000 pounds, or 17,400,000 bushels of sweet potato culs.

## Played Joke On Cambridge

**Some Years Ago Students Faked Visit Of Sultan Of Zanzibar**

The visit of the Sultan of Zanzibar to Cambridge recently recalled what was probably the greatest hoax perpetrated on any civic authorities. Some years ago it was announced that His Highness would visit Cambridge, and the mayor and corporation turned out in full splendour to pay homage to their distinguished visitor. In due course the Royal party arrived, and were received at the Guildhall. It was not until after full honors had been accorded that the councillors learned that they had been entertaining a party of their own students. The undergraduates were on vacation when the Sultan really arrived.

## English Gardeners Value Toads

English gardeners are always in the market for live toads, and not infrequently as much as \$25 per hundred is paid for this insect destroyer. It is estimated that every time a boy kills a toad, he is destroying \$100 worth of stock on a farm.

"Harry, I don't believe that you put the cat out."

"Well, if you think I'd tell a lie about a little thing like that, put her out yourself."

## Finishing Poultry For Market

**Putting Finishing Touches On Poultry Before Offering For Sale**

The time would soon be past when poorly finished poultry can be marketed with profit. Indeed it is held by authorities that putting the finishing touches on market poultry before offering it for sale, yields the greatest proportionate return of any labour done on the poultry farm. Well finished broilers or roasters undoubtedly cost less per pound to the producer than those that are poorly finished, and are much more desirable to the consumer.

The past methods of finishing poultry for market are described by Mr. F. C. Elford, Dominion Husbandman, in Bulletin No. 20, of the Department of Agriculture, at Ottawa. Crate feeding, especially for cockerels, is highly recommended, but it is also claimed by Mr. Elford that it will pay to adopt this method with pullets and hens when they are to be sold in dressed condition. Crate feeding is done both in small crates suitable for small flocks, and in feeding batteries for those who buy in chickens to finish in a large way.

In putting in a batch of chickens to be fattened it is recommended to allow them to miss a meal and then to feed sparingly for several days. This plan is necessary to avoid indigestion with birds that have been confined in small quarters after having been accustomed to free range. Twenty-four hours of fasting are recommended at this stage. After the birds have become accustomed to confined quarters by inercased the feed they should be fed two or three times a day all they are able to take, and after each feed the trough should be cleaned. Plenty of water at all times is necessary and a feed of grit several times a week is advised.

There are many ways of preparing the feed. This bulletin, obtained from the publications branch, Department of Agriculture, at Ottawa, recommends the use of only ground grain, fed in a wet state of a consistency that it may be pouren from the pail or dipped out with a ladle. Buttermilk is recommended as the best liquid with which to mix in preparing the feed. When skim milk is used it is recommended to allow it to sour slightly and to mix one feed ahead. A little salt added to much encourages chickens to eat more of the feed. Practically all of the coarser grains are suitable—corn, oats, barley, buckwheat, and wheat, etc., may be mixed in any combination. It should be about the line of ground and the coarser used removed. If water has to be used instead of milk in preparing the feed from 5 to 100 per cent. of animal foods, such as beef scrap or blood meal should be added to the grain mixture.

Instructions for killing and packing for market are included in the bulletin.

## Valuable For Briquettes

**Newly Discovered Coal Deposits In Ontario May Be Used For This Purpose**

Samples of coal taken from the area at Blacksmith Rapids, on the Abitibi River, where Ontario engineers have discovered extensive deposits, have been analyzed by the Federal Department of Mines experts, and indications are that the coal is valuable as material for briquettes or powdered coal.

Considerable treatment would be necessary before it could be of commercial value. However, the samples which the department examined were taken from seams near the surface, and it is believed a better product might be found at greater depth.

"Most men who reach the top of the tree are lonely," it is stated. They often sacrifice too many friends on the way up.

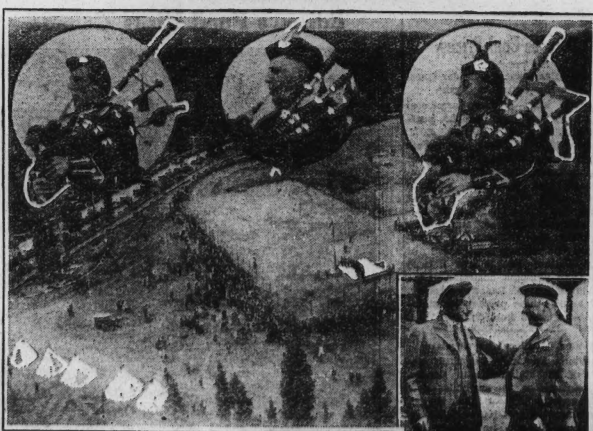

"What nonsense is this you have written? Is this happen again?"

"But that is not my writing."

"That is no excuse," Hummel, Hamburg.

## Where the Clans Gathered

Lay-out of the grounds of the Banff Springs Hotel, where the Banff Highland Gathering and Scottish Festival and the Dominion Track and Field Championships were staged recently. Centre photograph shows the grounds and (1) Piper Hector McDonald, Montreal, winner of first prize for strathpeys and reels, second prize for marches and winning the highest aggregate points over all in the open piping events; (2) Pipe-Sergeant, J. K.

Cairns, of Hamilton, winner of the trophy donated by E. W. Beatty, chief of police and president of the Canadian Pacific Railway, open to any piper of any pipe band officially connected with any unit of the Canadian militia; (3) Pipe-Sergeant Donald McLeod, of the Queen's Own Cameron Highlanders, Winnipeg, winner of the special trophy donated by E. W. Beatty, for the best piper among the delegate pipers from the various Highland regiments of Canada; (4) Lieutenant-Governor Wil-

liam Egbert, of Alberta, and Randolph Bruce, of British Columbia, at the Festival.

# Mysteries Are Wrapped Up In Strange Disappearances Of Many Deep Sea Vessels

Denmark has abandoned as hopeless its long search for a clue to the fate of the full-rigged clipper training ship "Copenhagen" with sixty cadets aboard, seen for the last time in the throes of her struggle with a heavy sea off a lonely island in the South Atlantic. During the seven months of weary exploration that has intervened, not so much as a spar, a lifeboat or a piece of floating wreckage has rewarded the Danish seamen who undertook the quest for the missing ship, the mystery that envelops the Copenhagen closely resembles that attending the disappearance of the United States collier "Cyclops," and it has prompted the New York Sun to recall other tragedies of the sea that also remain unsolved.

In the latter part of 1928 an American steamer came upon the schooner "Mary Cornish" in mid-Pacific. Nothing indicated that the schooner had suffered from disastrous weather or that it had been swept by a high sea. Bloodstains were found on a newspaper in the cabin, but no evidence of a struggle; there was neither officer nor crew aboard, and no boats were missing. What had occurred aboard the craft, will, in all probability, never be known. Two years before this the captain of the French sailing ship "Emile Gallien," in rounding Cape Horn, found a three-masted vessel embedded in an iceberg. The craft was firmly fixed in a cleft of the ice mass about twelve feet above the water's edge and, with the exception of a broken topmast, appeared intact. There was no sign of life aboard, and all the boats were in place. He reported the circumstance and the ship was tentatively identified as one long reported missing, but no one was able to offer an explanation of its loss.

A French steamer fell upon a large junk in the China Sea, which, upon investigation, the master found was deserted. In the junk he saw upon a cargo of silk and a considerable sum of money. The only explanation was offered by a Chinese member of the crew, who said that it was a craft belonging to a band of pirates who had fled the vessel in fear that the steamer was a disguised warship. As strange a discovery was reported by the captain of a Dutch liner plying among the West Indies and along the South American coast. He boarded a tramp steamer destitute of life except a starving dog. He found evidence that the crew had only shortly before abandoned the vessel. His theory was that when the ship had become becalmed they had taken to a small boat in the hope of towing the vessel, but had been swept away by a strong current. The steamer had been listed among missing ships, but in this case, too, only conjecture was left regarding the fate of its crew.

Not always does Old Man Sea leave so much of a clue to his mysteries. It is because he restored these missing ships to human ken that another chapter could be written of their disappearance.

**A Strange Coincidence**  
Peter Archer, a six-year-old boy, of Hull, England, who was knocked down by a motor omnibus and seriously injured, was being taken in an automobile to Hull Royal Infirmary, when the ambulance was stopped for a man who had been injured at work. He proved to be the injured boy's father.

Mrs. Brown eyed the joint critically. "Tell your master," she said to the butcher's boy, "that I shall buy my meat elsewhere if he doesn't correct the error of his weight."

"Have you ever heard of mountain folk?"  
"No, and don't expect I ever shall."—Lustige Sachen, Leipzig.

W. N. U. 1905

## Canada's Dairy Industry

Canadians Are Eating More Butter Than Ever Before

Dairying is a rather flourishing business in Canada right now. Canada is eating more butter than ever before. We are large consumers of this product. In 1928 we consumed 29.31 pounds per capita in this country as against about 18 pounds per capita in the United States. This is accounted for partly by the elimination of oleo-margarine from our market, although it is sold in the States. Also our butter is a better butter and induces a liberal use. The only real competition our dairymen face is in New Zealand butter, which is imported during the winter months, in small but increasing quantities. Canadian producers find that their storage product must compete against the fresh New Zealand product and the competition is difficult. But the effect of the importations has been exaggerated.

In cheese, Canada is building up a commanding position throughout the world. This is due chiefly to the fact that Canadian Cheddar Cheese is of high quality and sells at a premium in British markets over other imported cheese. This fact was referred to in a recent article in the Canadian Business Review, published by Cockfield, Brown & Co., advertising and merchandising experts of Montreal. The article was from the pen of Duncan Marshall, former minister of agriculture in Alberta, who is now a member of their staff.

There is a lesson in our experience with cheese. By improving quality, by grading properly and by establishing good marketing facilities we have put our cheese beyond the range of competition. Given proper leadership by Dominion and provincial departments of agriculture, our butter producers could do the same thing. The greatest danger in the dairy business at the present time is within rather than outside of the industry. It lies in the fact that the demand for cows is so great that many farmers are tempted to break up their family herds when they should be building them up.—Financial Post.

## To Exterminate Insects

Electric Light Rays Are Now Used With Good Effect

Light rays and electricity are being used in exterminating insect pests. Electric light traps, consisting of a lamp set directly over a pan of water upon which a covering of oil has been poured, entices the insect, who invariably falls into the film of oil and is unable to arise.

An electrified screen, stave door has proved feasible. The screen is charged with high voltage static, deadly to pests but harmless to humans.

Boy Friend (calling fiancée): "Hello, dear, would you like to have dinner with me tonight?"  
She: "I'd love to."  
He: "Well, tell your mother I'll be over early."

The culture can see from a great height, while the chick, or the wren, will pick at objects so small that the human eye misses them.

## President Inspects Resort

Among the many places visited by R. W. Beatty, chairman and president of the Canadian Pacific Railway, and the directors who are now on a tour of the company's properties in the west, was the famous fishing and hunting resort at Nipigon. Mr. Beatty is seen accepting a bouquet of Nipigon Chrysanthemums from Miss Emma Porter, daughter of the operator at Nipigon Depot, and is also shown conversing with Tom Running Deer, Indian guide attached to the camp. The president and directors spent several hours in the camp on their way to the west.

## Held Important Military Posts

Brig.-Gen. Sir Gilbert Clayton, high commissioner for Iraq, who is dead after collapsing following a polo game. Sir Gilbert was 54 years of age, and had held several important military posts.

## Rambouillet Sheep

Considered To Be the Best Breed For the Beginner To Raise

Although not well known in the province of Manitoba, the Rambouillet breed of sheep enjoys a wider distribution on the North American continent than almost any other breed. They possess some very desirable characteristics, in that they are unusually hardy, and free from most diseases that affect sheep. They have an excellent quality of wool, the ewes make excellent mothers, and through a foundation of Rambouillets, a high class flock of any of the blackface breeds may be quickly developed by the farmer who gives careful attention to his breeding practices. There is no doubt but that the Rambouillet breed is the best for the beginner in sheep, owing to the fact that generations of breeding on the large ranges, has developed in this breed, a remarkable ability to take care of themselves under any conditions. The sheep that are being supplied to Manitoba farmers by the Manitoba Livestock Credit Company, this fall, are a carefully selected lot of the Rambouillet breed.

## Merely An Uncle

Lord Macduff, the young son of Prince and Princess Arthur, of Connaught, had just learned the words of the national anthem, and he told his nurse that he wanted to see "Our Noble King."

One day, when the King was walking in the grounds at Baginbun with the Duke of Connaught, Lord Macduff was told by his nurse, "Look, there is the King, with Grandfather."

"Oh, no," said little Lord Macduff, "that is not the King. That is my Uncle George."

The only place a woman cannot attain her point is on a lead pencil.

The French perfumery industry is valued at \$36,000,000 a year.

# Daily News Bulletin Service To Be Supplied Residents Of Far North By Edmonton Station

## West Going Ahead

Sir Henry Thornton Takes Note Of Developments On Trip To Western Canada

"There is a silver lining to the cloud insofar as the situation in Western Canada is concerned," stated Sir Henry Thornton, chairman and president of the Canadian National Railways, on returning to his headquarters in Montreal, after a tour which took him throughout the Western Provinces and to the Pacific Coast.

"While it is true that the West is not harvesting such a voluminous crop as in average years, and it is also true that some farmers and some districts are hard hit, it must be remembered that there are districts and farmers in those districts who have harvested better crops than they anticipated a short time ago, and who are reaping the benefit of higher prices from their held-over grain from last year, and also higher prices for the grain which they have produced in 1929."

The West has gone ahead and is going ahead; building up on a basis of sound progress, and one going from the East cannot fail to be impressed with the same development which is taking place on all sides.

"On the Pacific Coast, in particular, the development of trade with the Orient is being closely followed, and there is also a realization of the fact that Canada is sharing and will share to a greater degree in the further development of that trade," Sir Henry said, concluding with the statement that he had inspected the properties of the system in each of the provinces visited, and he had found things in good condition everywhere with the officers and employees keenly on the alert to provide the best service to its patrons.

## Russian Farm Uses

### Machinery Exclusively

Soviet Grain Trust Cultivated 350,000 Acres Of Land This Year

M. Kalmanovich, head of the Soviet Grain Trust, when in New York recently, stated that the Grain Trust cultivated 350,000 acres of land this year. It was formed last year to organize and operate large grain farms entirely by machinery. The Grain Farm in the Northern Caucasus, has a cultivated area of 120,000 acres. The sowing period of this farm lasted only 9 days, 650 tractors being involved. This is the world's largest farm using machinery exclusively. The Soviet Government has allotted 400,000 acres of land to the Grain Trust this year. Out of this total 2,250,000 acres will be sown next winter and spring. The plans for 1931 call for the cultivation of nearly 6,000,000 acres out of a total of 11,000,000 acres that the Grain Trust will have under its control in that year. The Soviet Government has a machinery and tractor service, with a capital of \$25,000,000, which operates fleets of tractors to cultivate peasant land. The stations of the State Machinery and Tractor Service, which are expected to plough nearly 2,500,000 acres next year, will receive in payment for their services a part of the crop ploughed.

## Large Ranch Authorized

Southern Alberta Company Is Holding 99,681 Acres In Lease

The days of vast ranches have not altogether passed from the prairies. The Canada Gazette recently authorized the Pigeon Ranching Company, which operates south of Medicine Hat, in Southern Alberta, to hold 99,681 acres in lease in spite of the official regulations which limit holdings to 25,000 acres. The Pigeon Ranching Company owns 3,000 cattle, 100 head of saddle and work horses, and 56 head of pure-bred Hereford and Shorthorn bulls.

## Goos To Eastern University

Dr. L. A. Munro, assistant professor of chemistry at Manitoba Agricultural College for the past four years, has severed his connection there, and leaves for Kingston, Ont., where he has accepted a position as assistant professor of chemistry at Queen's University. Dr. Munro took his Bachelor's and Master's in Arts at Dalhousie, and his Ph.D. from McGill, and joins Queens with the best of academic and practical training.

Some gourds weigh as much as 80 pounds.

## Residents of Aklavik and other points inside and outside the Arctic circle in the far north are to be given a daily news bulletin through the action of Hon. Charles Stewart, minister of the interior, who with the co-operation of the Royal Canadian Corps of Signallers has inaugurated a wireless news service which will do much to improve the isolation of those pioneer men and women—traders, ranchers, trappers, prospectors, missionaries, doctors, teachers and members of the Royal Canadian Mounted Police who are carrying civilization into the far north.

For the past few years the residents of the Mackenzie District have had the benefit of the wireless service for telegraphic purposes. Stations at Fort Smith, Resolution and Simpson, in the valley, and Aklavik and Herschel on the Arctic coast, have been linked up in this manner with the R.C.S. station at Edmonton, but only commercial and urgent private messages have been handled.

However, Mr. Stewart felt that something more could be done with the equipment, and he has now, in co-operation with the department of national defence, made arrangements whereby every day one of the officers of the Department of the Interior, at Edmonton, prepares a 500-word bulletin of news of special interest to northern residents, to be broadcast to the receiving stations of the north.

The bulletins thus received are posted at the local offices of the North West Territories and Yukon branch, and at all police posts where they are obtainable, and where they can be read without charge by the residents of the various settlements.

The work has been placed in the hands of assistant commissioner of Dominion lands, R. B. Matheson, and the first 500 word bulletin has been sent out. The news bulletin will be continued without interruption as far as possible, and according to northerners now in the city will prove of insatiable benefit to people living in the outlying sections who will thus be kept in touch with world events and Canadian happenings of particular interest to them.

## Describing a Canadian

Immigration Act Leaves No Room For Argument

From time to time the question is asked: "What is a Canadian?" There is an agitation for provision in the census defining Canadians and it is likely this will be done in the next census two years hence.

As a matter of fact, a Canadian is clearly described in the Immigration Act as follows:

"(i) A person born in Canada who has not become an alien; (ii) a British subject who has Canadian domicile; or (iii) a person naturalized under the laws of Canada, who has not subsequently become an alien or lost Canadian citizenship. This would appear to meet the case adequately.

## Investigate Movie Industry

Professor Kenneth W. Taylor, of economics department of McMaster University, has been appointed by Hon. Peter Hensan, minister of labor, to assist in the preliminary inquiry, under the Dominion Combines Investigation Act, into the alleged combine in the motion picture industry in Canada, it was announced by the Department of Labor.

Whether an individual who owns a piece of property also owns the air above it, and whether he may pollute the air, is a disputed legal matter.

Sugar is found in the sap of nearly 200 plants and trees.

"You are lucky in love, Mr. Du point."  
"Exceedingly—I am still a bach elor."—Moustique, Chariol.

BOILS, ECZEMA, ETC.**

## WORLD HAPPENINGS BRIEFLY TOLD

Great Britain in 1923 had the lowest infant death-rate ever recorded. Out of every 1,000 children who lived to be one year old, only 65 died.

The population of Saskatoon is nearing the 50,000 mark, according to 1929 issue of Henderson's Directory. It is now estimated by the publishers that this city has 47,653 residents.

The Aero Arctic Association has announced that financial backing has been obtained for the Arctic expedition of the Graf Zeppelin next spring. Dr. Hugo Eckener, commander of the dirigible, will have 45 persons with him on the flight.

The promotion of Charles Clifton Perry from the post of Indian agent at Vancouver to that of assistant Indian commissioner for British Columbia, at Victoria, has been announced by the civil service commission.

Some of the first issue of Danish cancer stamps have been seen in London. These stamps issued by Denmark to benefit the Danish cancer fund, are in three colors, red, green and blue, in three denominations. All bear the Mercury wand design.

It's just as easy to get wrong numbers at sea now as it is at home. Telephone booths and other conveniences have been built on the steamship Berengaria for regular land communication while the ship is going between England and other countries.

A reward of \$1,000 has been offered by the provincial government for information leading to the arrest and conviction of person or persons in the Donkshol district responsible for the burning of schools throughout the area. This announcement was made by M. A. MacPherson, attorney-general.

## The Newspaper Guide

Advertisements Are To Shoppers What Time-Table Is To Traveller

The newspaper that carries a good line of advertisements is to the shopper what the time-table is to the traveller and the published guide to the tourist. Busy people start to study these advertisements in the home or in the office, and before they start shopping they know where they are going.

In fact, business places are points of interest to all tourists, and the non-advertiser puts himself outside the pale so far as strangers are concerned.

**Edmonton Building Permits**

Building permits in Edmonton topped the \$4,000,000 mark this year, up to the end of August, being \$4,188,290 or more than a million above the similar eight-month period of last year.

**Extending Radio In Arctic**

Russia is rapidly radiofying its Arctic possessions. The radio and meteorological station at Frans Joseph Land already is functioning, and another is being constructed on Wrangel Island.

A Bible from the Russian Imperial Palace of Tsarskoye Selo, its cover encrusted with diamonds and emeralds, was recently offered for sale in St. Petersburg.

## Germany Planning World 'Plane Lines'

Company Aims For Regular Flying Boat Service Over Atlantic In Two Years

A gigantic network of air lines which will cover the entire world is being planned by Luftthansa, Germany's most important air company. The plans are being worked out by Otto Merkel, who has given up his post as head of Luftthansa to devote himself to founding an international company, which promises within two years to open regular air lines between Europe and the United States.

Working jointly with the Hamburg-American steamship line, preliminaries have been completed. The details of the new company are still somewhat uncertain, but the approximate direction of developments has been mapped out.

"Not only is the world's interest concentrated in air travel, but in all countries the best technical experts are working out the details," said Herr Merkel. "The experimental stage is behind us and the goal is clear. We have fine planes now, especially in America, excellent motors, and everywhere responsible pilots and dependable instruments which will result in an even higher standard soon."

## Device Registers Accidents

New Invention To Help Catch Hit-and-Run Driver

A device to catch "hit-and-run" drivers of automobiles has been made by a Berlin inventor named Rudolf Hofmann. The mechanism is described as "an automatic traffic protector."

It is adjusted under the chassis of an automobile and at the instant of any impact automatically raises a white plate with a winking red light above the car's license plate. It also registers the automobile's speed.

## World Famous Artists On Canadian Radio

HAROLD BAUER FLORENCE AUSTRAL

Florence Austral, the world's greatest dramatic soprano and Harold Bauer, one of the outstanding pianists of all time, two of the world famous artists who will be heard on the air this season during the Imperial Hour of Fine Music, to be broadcast from Toronto every Sunday evening, beginning on October 6th, from 8 to 9 Central Standard Time. Miss Austral appears the series on Sunday evening, October 6th and Mr. Bauer will be heard on October 20th.

Announcement of a series of concerts by world famous artists on a Canadian radio chain was made yesterday by F. J. Wolfe, Director of Imperial Oil, Limited. The series will begin on October 6th and will continue for twenty-six weeks. It will be broadcast through stations at Montreal, Ottawa, Toronto, London, Waterloo, Winnipeg, Saskatoon, Regina and Red Deer and, with the completion of hook-up facilities at the end of the year, at Vancouver.

Among the universally known artists who have been engaged for this series are Florence Austral, the world's greatest dramatic soprano; Sophie Braslau, the great contralto; Harold Bauer, one of the outstanding pianists; Richard Crooks, the American tenor who, though only twenty-eight years of age has scored notable triumphs in Europe and America; Lea Lubushtz, who is said to be the greatest of all women violinists; Hans Krieger, the famous Dutch cellist; The London String Quartet; Albert Spalding, great violinist; Lucella Malus, one of the most famous coloratura sopranos; Josef Hevlinne, the great Russian pianist; Richard Bonelli, leading baritone of the Chicago Opera; The Redoff Quartet, formerly of the Imperial Palace at Petrograd, and others.

The series will consist principally of symphony concerts at most of

which one or more of these famous artists will assist. A great symphony orchestra of more than fifty players has been engaged and will be under the direction of Reginald Stewart who has lately returned from a concert tour in Europe, and who has been engaged as a guest conductor for the London Symphony Orchestra in April next. The concerts will originate in Toronto and will be offered from 10 to 11 o'clock Eastern Standard Time for twenty-six consecutive Sunday evenings, beginning October 6th.

"Our object in promoting these concerts," Mr. Wolfe said, "is to bring to people within reach of available hook-up facilities in Canada, music and artists which, without the medium of radio, could not be heard outside the great metropolitan centres. We do not regard radio broadcasting as a direct advertising medium and feel that it can function most usefully in purveying entertainment of educational and artistic merit. The aim of the orchestra and great artists will be to broadcast classical music and modern novelties of more than ordinary merit."

The series, which will be known as The Imperial Oil Hour of Fine Music, will go on the air through stations CHYC, Montreal; CNEO, Ottawa; CKNC and CFBF, Toronto; CIGC, London; CKCR, Waterloo; CKY, Winnipeg; CHWC, Regina; CFCQ, Saskatoon; and CKLG, Red Deer.

## Recipes For This Week

(By Betty Barclay)

### GRAPEFRUIT PRESERVE

Remove outer yellow rind and most of the white by peeling very thick. Have the fruit, and with sharp knife cut out the core. Then slice across and place pulp in granite kettle with very little water and cook at moderate heat. When at boiling point, add three-fourths pint of sugar to each pint of fruit pulp and juice, then cook slowly 15 minutes. Seal in small jars.

### GRAPE JAM

Stem grapes, wash and press pulp from skins. Place pulp in a kettle, cook until soft, then rub through sieve to remove seeds. Cook skins until soft in just enough water to cover. Combine the two mixtures and boil for five minutes. Measure and allow one cup of sugar to each pint of fruit. Cook until thick, which will be in a very few minutes. Then pack in clean hot jars and seal carefully.

### Everybody Was Pleased

He was in London for the first time, and his uncle, a stockbroker, was showing him round Throgmorton Street.

"Why is that little fat man winking and whispering to all those others?" asked the visitor.

"Oh," returned his uncle, "he's just bought in the stock of an oil company dirt cheap."

The visitor looked about him and noticed another man who was also whispering and chuckling to some friends.

"What is he so pleased about?" he asked his uncle.

"Oh," was the reply, "he's the man who sold the stocks."

### Putting Her Right

A little girl carrying two kittens to Oldham, lost her way, so accented a passing rustic thus:

"Excuse me, but is this the way to Oldham?"

"No, miss," came the ready response, "you want to take 'em by the scruff of the neck!"

## SUNDAY SCHOOL LESSON

OCTOBER 6

### RECOGNIZING OUR DEBTS TO OTHERS

Golden Text: "Not looking each of you to his own things, but each of you also to the things of others."—Philippians 2:4.

Lesson: Nehemiah 4:15-23; Mark 12:28-34; Romans 15:1-7; Philippians 2:1-8; Colossians 3:12; 4:1; James 2:14-17.

Devotional Reading: Psalm 40, 5-10.

### Explanations and Comments

Recognizing Our Debt To Others, Mark 12:28-34.—A scribe who was standing by, and knew that Jesus had answered wisely the question put to Him, asked Jesus, "What Commandment is the first of all?" Jesus replied by quoting Deuteronomy 6:4-5: "Hear, O Israel: The Lord our God, the Lord is one; and thou shalt love the Lord thy God with all thy heart; and with all thy soul, and with all thy mind, and with all thy powers." In these terms some interpreters recognized the language of a primitive psychology, an attempt at a threefold or fourfold division of human nature, "soul" referring to emotion, "mind" to intellect, and "strength" to will. But whatever may be thought of this suggestion, it is manifest that the words are intended to claim for God the affection of human nature in all its extent and in all its intensity. James Stalker.

"The second is this," continues Jesus and quoted Lev. 19:18: "Thou shalt love thy neighbor as thyself." The chief service rendered by Jesus to this second commandment was to associate it so closely with the first that the Old Testament was to two Commandments lie far apart with no indication of any connection between the two. He brought the two together in such a manner as to suggest that they have an intimate relation to each other. In reality they are twin commandments, and so closely are they connected that they cannot exist, or, at all events, they cannot have a healthy existence, apart.—James Stalker.

And in our Debt To Others, James 2:14-17.—"What doth it profit, my brethren," James asks (the Greek means literally, what is the use), "if a man say he hath faith, but have not works?" can that faith save him? "What we think, or what we know, or what we believe is, in the end, of little consequence; the only thing of consequence is what we do," he is speaking of a mere doctrine, a barren belief that does not lead to action; and so James when he says, "What doth it profit if a man say he hath faith, but have not works?" here, as the Expositor's Greek Testament explains, "faith is expressed in the 'SHEMA' (Deu. 6:4 etc.): 'Hear, O Israel, the Lord our God, the Lord is One'—this was the fundamental tenet of the Jewish faith, and that it is this to which reference is made, and not the Christian faith, is obvious from verse eleven, which contains the essence of the 'SHEMA.'"

### Saving In Train Haul

Grain shipped from Saskatoon to Liverpool by way of Montreal has to travel 1,221 miles. By way of Churchill it has to travel 3,701 miles. The distance between the two ports and Liverpool is about the same—the saving is in train and lake haulage in Canada and changes and reloading.

### Sweden Leads The World

Sweden today leads the world in the number of radio receiving sets, in proportion to its population. The latest statistics show that there are 42,115 sets to about 6,000,000 inhabitants, or 67.5 for each thousand citizens.

Germany is holding many centenary celebrations this year.

## Take Off Over-weight

Modern science says sugar supplies energy that lets you carry on with less food and safely reduce weight.

WRIGLEY'S is pure chiclet, sugar and flavor. Chiclet the chiclet dissolves the sugar and releases the flavor.

In this pleasant way you get needed body fuel and reduce the pounds.

## Remarkable Self-Denial

Scottish Girl Saves Enough To Bring Family To Canada

After having been only two years in Canada, Miss Jean Turley, late of Coalburn, Lanarkshire, Scotland, has been able to bring her father, mother, and ten brothers and sisters to join her in the home which she has prepared for them in Montreal.

By denying herself every luxury—she has never been inside a picture show in Canada—and saving every cent of her wages as a servant, Miss Turley was able to save part of the large family's passage money, the remainder being provided by the British Dominions Emigration Society.

Miss Turley's father found work difficult to obtain in Lanarkshire, but jobs in Montreal have been promised to all members of the family old enough to undertake them.

Miss Turley is now 23, and her brothers and sisters range from 21 to 3 years of age.

Speaking of the sacrifices which she had made for her family, Miss Turley said:—"It is all over now, and I am very glad to see them."

## WINDOLITE The Improved Glass Substitute

### COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and does not warp. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, not beds, pipe coverings and greenhouse coverings. It will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 230 to 240 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

### The Singing Fool

By HUBERT DAILEY  
Copyright, 1919, Warner Bros. Pictures, Inc.

#### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club wins fame on Broadway as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous, too. Molly has a baby, Junior, whom Al loves. Molly becomes romantically interested in John Perry, Al's close friend, and Perry begs her to leave Al. On the third anniversary of his marriage Al takes Molly home from the Club Bombo, where he is part owner. She is moody; her conscience bothers her because of her behaviour with Perry. This is intensified when Al goes to the nursery and she sees how ardently he loves Junior. Later, in a burst of rage, she tells Al she doesn't love him any more. Al, who recalls, Molly hears Junior calling her.

#### CHAPTER XV.

Junior had awakened to find that his toy, his woolly dog, had dropped out of bed. So he was calling to Molly to come and get it for him. As his high childish voice drifted through the rooms to Molly and Al they gave a start. The expression on Al's face softened in an instant. Molly's remained the same as she brushed by Al to look after Junior.

Al turned, looking after her retreating figure, still in a daze from her harsh words. He had lost her love, she actually said so herself! Her words and the heart-breaking scene he had just passed through seemed fantastic and unreal to him. What had he done to deserve her indifference and her scorn?

Then, like a man in a dream, he followed her toward the nursery. Standing in the doorway, he saw her pick up Junior's woolly dog from the floor, replace it in the child's arms, and carefully tuck him in.

"Go to sleep, now, Junior. Then Mamma can sleep too."

How strangely contrasting was that soothing voice to the tone Molly had just used in addressing Al! And how kind the expression on Molly's profile as she bent over Junior's bed! Surely this was not the end, thought Al. He suddenly determined that he would not let her life together be blasted by her whim; he would fight to reawaken Molly's love!

As Molly came toward him he raised his hand with an apologetic gesture. "Darling, can't we talk this out? If I've done anything tell me!"

"No—no more talk!" Molly passed him, entering her bedroom. He heard her door close with a snap of finality.

But now Junior was sitting up, holding out his arms to his father. "Daddy, please sing me to sleep."

Al came forward swiftly, picking up Junior, holding him close as if to drive away the wound Molly had inflicted. Here, at any rate, was someone who loved him, trusted him, and always greeted him with the same adoring, happy smile. For moment Al choked up and couldn't speak. Then he said huskily,

"What do you want me to sing, baby?"

"You know," whispered Junior confidently, "that one about a little boy like me."

"Little Feller?"

"Yes, that one."

Slowly Al began to sing, rocking Junior gently to and fro. There was only an audience of one to hear—and that a very sleepy audience—but the tenderness and appeal of Al's words had not been matched since that night three years ago when he had sung the love ballad "Always." To touch Molly's heart, as the song continued Junior's head drooped in drowsiness and presently his eyes closed. When Al knew that he was really asleep the rhythmic words trailed off into a whisper and silence. Then, pressing the little form close to him for a last good-night hug, he put his son back in the cradle.

Once more the tip-toeing from the room. Then Al stopped and gazed wonderingly at Molly's closed door. She was still up; in the semi-darkness of the hallway he could see a faint narrow line of light under the door.

Perhaps she was already repenting of her quick, unkind words—how passionately he wished that he could make up to her now, but let her make up to him now, but perhaps in the morning.

Until the long black hours of the night faded into the gray dawn Al sat up in bed, gazing out the windows of the city, smoking one cigarette after another, wondering, hoping, planning.

In the morning Molly's manner was still cold, but her whip-lash tongue was silent. She avoided meeting his eyes and when she spoke it was about necessary things concerning Junior or the household. Al watched her, hoping to detect a softening glint in those icy blue eyes, but there was no sign of relenting. Finally he left the apartment for his work.

All through the day and evening there was an actual sharp pain in Al's heart as if a knife had been driven swiftly into him and withdrawn. But he went about his work the same as usual, trying to forget the scene of the night before. When he saw Molly after her performance that evening he thought she was in better humor. She was not cordial, by any means, but she made some attempt to treat him courteously. His heart gave a bound; in a few days, he told himself, this mood of hers would wear off and she would be her own lovely self again. Her life together would not be smashed, after all.

So the days passed, with Molly avoiding Al most of the time, and maintaining a certain secrecy of manner when she did talk to him. Then New Year's Eve arrived, the New Year's Eve that Al was to remember always.

It was the big night in the city's life of revelry; now blanketed the streets, embellishing the roofs and facades of the houses and skyscrapers, emphasizing the dazzling fantasy of brilliant Broadway.

At the Club Bombo the cause of "whoopie" had its most devoted adherents. The crowd in evening dress wore tiny carnival hats and danced

with the true spirit of abandon as midnight approached. Long streams of confetti in brilliant red, green, blue, yellow and purple were shot across the room, describing graceful curves before they fell across the dining tables and the shoulders of the dancers. It was the biggest crowd the Bombo had ever entertained and on the raised orchestra platform, stood Al, wearing a fantastic head-piece, a megaphone in his hands. He was leading the merriest, but the ache in his heart was still present.

Perhaps, he thought, the unrestrained gaiety of this night would change Molly's mood so she would become her old, friendly self. He gave a hurried glance toward her reserved table; she should be here by now. Then came the distracting business of introducing the celebrities, and once more he glanced at the vacant table and consulted his watch. Molly was at least a half hour late. He nodded toward the orchestra leader, signalling for another dance.

As the dancers swept toward the bar, Al retreated among the tables. What was keeping Molly? He could hear the shrieks of the strens from outside—the New Year had arrived, the time when feuds and misunderstandings are forgotten, new resolutions are made, and life begins anew. All this, he hoped desperately, would influence her.

The orchestra was playing with staccato briskness and abandon, the couples swayed and nudged and called to one another.

"Choose a partner yourself!" cried a friend in passing, clapping Al on the shoulder. Al laughed in answer, but a moment later he moved toward the phone room at the rear. Perhaps Molly had gone straight home from the theatre—he must find out!

The phone room was a sort of alcove, with three or four booths. Al entered one, pulling the door shut and calling his apartment number. But the door suddenly drifted open, allowing a roar of happy sounds to enter. Just then he heard a feminine voice at the other end of the line. Molly's voice, he thought. He quickly pulled the door shut again and said:

"Molly, dearest, I've been holding your table for you—hoping you'd come."

But again the door flew open and he missed the answer.

(To Be Continued.)

#### Intends To Collect Pay

Circus Water Carrier Inherits Fortune But Wants His Wages

A 21-year-old \$84-a-week water carrier for a circus playing in Portland, remained at his post under the white tops and refused to leave to collect a \$275,000 inheritance available in Los Angeles, because, he declared, the circus owes him \$40 "hot back" money, which he won't get if he leaves.

The youth, Robert Sterling, of Philadelphia, said he would remain with the circus until it reached Los Angeles, where he would answer personally the telegram received from an attorney informing him of the inheritance left by his father.

Sterling said when the Radio Corporation of America was organized his father operated a radio shop in Philadelphia and purchased a few shares of stock in the corporation. When the elder Sterling died in 1927, Robert said, he left the stock in keeping of a Los Angeles attorney until Robert became of age. Young Sterling became 21 years old on July 20, but he said he was so "busy" filling the cook house ice tanks with water, that he paid little attention to the attorney's notice.

To have the children sound and healthy is the first care of a mother. They should be healthy if troubled with worms. Use Mother Graves' Worm Exterminator.

#### Paris Is Particular

Unaccompanied Women Are Refused Service In Many Cafes

Numerous cafes in Paris still refuse to serve unaccompanied women and the newspapers have taken up the question of the removal of the ban. They argue that times have changed and that women should be catered to even when alone. The fact seems surprising from a New World point of view. On this side of the water nowadays women go unaccompanied to theatres, cafes, hotels and all other public places, and the fact of their being alone is unobserved.

#### Applies To Every Nation

If China and Russia should go to war ninety-five per cent. of the population of either country wouldn't know what it was all about. But that is pretty nearly the case with a war in any nation.

#### Says Vancouver Best Outlet

Nothing In Way of Branch Lines For Peace River District Declares Beatty

"When rail connection is established between the Peace River District and the Pacific coast, it would appear that Vancouver would be the logical point for the outlet on the coast," declared E. W. Beatty, president of the Canadian Pacific Railway, who returned to Vancouver Wednesday from Victoria.

Mr. Beatty was non-committal as to when and how rail connection between the coast and the Peace River area should be made. He suggested that coast connection would be the natural consequence of developments in the Peace area, and intimated that it might not be advisable to undertake the great expenditure until the period had arrived when no mistake could be made.

Regarding the Pacific Great Eastern Railway, Mr. Beatty said that it would be time enough to discuss that matter when the survey now under way by the provincial government, the Canadian Pacific, and the Canadian National has been completed, and that the direction of this road, jointly owned by the Canadian Pacific and the Canadian National will likely have some announcement to make at the end of the year.

Answering a direct question as to whether there is any obstacle in the way of a branch of this road being run into British Columbia block of the Peace River area in order to give relief to farmers now located from 60 to 100 miles from the railroad, Hythe, he said that he saw no reason why it could not be done.

#### THE RESPONSIBILITY OF EVERY MOTHER

The child in the home is a never-failing source of joy, but at the same time a never-failing responsibility to the fond mother. It not infrequently happens that minor ailments of the child distress and puzzle her. She does not know just what to do, and the mother's greatest help and friend.

Many of the ailments arise in the digestive tract—the bowels become clogged and the stomach sour. Baby's Own Tablets are a never-failing relief for this condition. They are a mild but thorough laxative and through their action on the stomach and bowels they banish constipation and indigestion; break up colds and simple fever; allay the pain accompanying the cutting of teeth and promote healthy living. Jennings, Mackay, Ont., writes: "I have used Baby's Own Tablets and thank so highly of them that I would not be without them. Please send me your little booklet on the care of children."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams Medicine Co., Brockville, Ont.

#### Proposed Fish Cannery For Manitoba

According to the "Canadian Fisherman," a fish cannery is being proposed to pack fish products of the Manitoba lakes. It is also reported that efforts are to be made to utilize the large available quantity of coarse fish and fish offal from the Manitoba fisheries and stock feed manufacture.

Do not allow worms to sap the vitality of your children. If not attended to, worms may work irreparable harm to the constitution of the infant. The little sufferers cannot voice their ailment, but there are many signs by which mothers are made aware that a dose of Miller's Worm Powders is necessary. These powders act quickly and will expel worms from the system without any inconvenience to the child.

#### Works Both Ways

You will find, young man, that as long as you have to work for a living there will be something about the job you are on, or somebody working with you, that you don't like. Forget it and look to the future. Some other fellow may feel the same about you.

#### Minard's Liniment For Warts.

England has had only one king who grew to manhood and who never married. He was William Rufus, or William II, son and successor of William the Conqueror.

## Real Dyes are easier to use

DIAMOND DYES are used by practically the same method as any other dye. They go on easier, though—more smoothly and evenly—without spotting or streaking. That's because they are made from real anilines, without a trace of fillers to injure fabrics or give things that redden look.

Diamond Dyes contain the highest quality anilines that money can buy. That's why they give such clear, bright, even-looking colors which keep their depth and brilliance so remarkably through wear and washings.

Next time you have dyeing to do, try Diamond Dyes—at our risk. See that they are easier to use. Then compare results. You will surely agree Diamond Dyes are better dyes.

## Diamond Dyes

Sun Proof  
EASY TO USE—BETTER RESULTS

#### Strange Aerial Cargoes

Airplanes Are Now Used To Carry Every Kind Of Shipment

Fifty tons of milk are being carried every week by aeroplane between London and the Continent, says a Titi-Bits writer.

Recently a consignment of sea-horses from the Zoo arrived by aeroplane at Croydon. Great care was lavished on these fantastic creatures, half horse and half dragon, which were caught in the Bay of Biscay, and throughout the flight air was pumped into their tanks at ten-minute intervals.

Delicate goldfish are often transported in this manner, but the most valuable fish cargo by air was a number of very rare, rainbow trout specimens from the East Indies, some of which were valued at \$180 per inch.

A barred cage was recently built inside the fuselage of an aeroplane which left Croydon for Le Bourget, where it picked up a fully grown lion, complete with trainer, and brought them back at over 100 miles an hour.

Another special compartment was fitted in an aeroplane to accommodate a performing circus horse from Paris to London; while an air-freighter arrived recently from Amsterdam with a bear, a monkey and a consignment of parrots.

Twenty years ago it would have been impossible to build a road to the site of the new observatory on Mont Blanc. The aeroplane has made it possible to convey the stones and materials to a height of over 13,000 feet on the mountain side; but when the road is completed it will be one of the most expensive in the world.

It seems strange that milk, easily obtainable in all great cities, should be carried by air, but mysterious zinc-lined boxes were once regularly carried from Croydon to Paris, and these contained two gallons of milk in glass bottles, packed in ice.

The American visitors to whom the boxes were addressed had been so impressed with the purity of English milk that they cheerfully paid six pence to have it delivered to them in Paris!

#### Would Change Denomination

A party of clergymen were attending a Presbyterian conference in Scotland. Several of them set off to explore the district.

Presently they came to a river spanned by a temporary bridge. Not observing a notice that the bridge was unsafe, they started to cross it. A bridge-keeper ran after them in protest.

"It's all right," declared the spokesman, not understanding the reason for the old man's haste; we're Presbyterians from the Conference."

"I'm not caring about that," was the reply, "but if ye dinna get off the bridge ye'll all be Baptists!"

The province of Saskatchewan which produces about one-half of the total wheat yield of Canada, is the third largest producer of dairy and also of eggs and poultry among the nine provinces of the Dominion.

Friend—You think then that the heathen are slow to adopt the white man's religion.

Globe Trotter—Yes. You see, they have to adopt his vices before they see the need of it.

Many would put the world right, but forget to start with themselves.

For Sprains—Use Minard's Liniment.

agree Diamond Dyes are better dyes. The white package of Diamond Dyes is the highest quality dye, prepared for general use. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes contain the highest quality anilines money can buy. They are the anilines that count. They are the rich dyes; the source of their rich colors; brilliance and permanence.

#### Little Helps For This Week

"He will be very gracious unto thee at the voice of thy cry."—Isaiah xxx. 19.

Father! before Thy footstool kneeling.

Once more my heart goes up to Thee.

For strength, to Thee appealing.

Thou who alone canst succor me.

And oh! in my exceeding weakness.

Make Thy strength perfect; Thou art strong!

Aid me to do Thy will with meekness.

Thou to whom all my powers belong.

There is no good in praying; for anything, unless you will also try for it.

All the sighs and supplications in the world will not bring wisdom to the heart that fills itself with folly every day, or mercy to the soul that sinks itself in sin, or usefulness and honor to the life that wastes itself in vanity and idleness.

—Henry J. Van Dyke.

#### Opinion Wasn't Worth Much

It is told of a popular solicitor that he called upon a brother in the profession, and asked his opinion upon a certain point of law. The lawyer to whom the question was addressed drew himself up and observed: "I generally get paid for what I know."

The questioner drew a half dollar from his pocket, handed it to the other and coolly remarked: "Tell me all you know and give me the change."

#### The Man With Asthma almost

longs for death to end his suffering. He needs almost only years of endless torment with intervals of rest which are themselves fraught with never ceasing fear of renewed attacks. Let him turn to Dr. J. D. Kellogg's Asthma Remedy and know what complete relief it can give. Let him but use it faithfully and he will find his asthma a thing of the past.

#### The first reference to sugar

obtained from cane was made by Theophrastus in the third century B.C. He mentioned it as "honey" which came from bamboo.

#### DOCTORS quite approve the

quick comfort of Aspirin. For these perfectly harmless tablets will ease an aching head without penalty. Their increasing use year after year is proof that they do help and can't harm. Take them for any ache; to avoid the pain peculiar to women; many have found them nervous at such times. The proven directions found in every package of Aspirin tell how to treat colds, sore throat, neuralgia, neuritis, etc. All druggists.

## Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been maintained for 60 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods again. You know this better method. And you will never suffer from excess acid when you prove out this easy remedy. Ask that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any druggist.

ness visitor in Foremost last week

Mrs. and Mr. Glyn Jones, of  
Calgary visited here last week-end

Mr. C. W. Donald made a busi-  
ness trip to Calgary Thursday.

Archie Boyce, of Carstairs was a  
business visitor in town on Friday.

Mr. H. Lillard has installed a new  
victor combination radio in his resi-  
dence.

Mr. C. Calhoun was a visitor in  
Crossfield during the beginning of  
the week.

Mr. and Mrs. T. M. Mair have  
recently moved into the Nerland  
place.

Mrs. C. Weber and small son  
were, Calga visitors during the  
first part of the week.

Mrs. Cowling is building a new  
school for mentally deficient chil-  
dren on her property west of town.

Miss Ruth Stauffer and Miss  
Margaret Muccicci, spent the  
week-end at their homes.

Mr. and Mrs. Sefton have moved  
into the house recently vacated  
by Mr. and Mrs. Waldoek.

Mrs. Porteous returned home  
on Wednesday after a weeks visit  
with friends in Calgary.

Mr. Percy Willis who was at home  
for a few days this week has returned  
to Turner Valley.

Mr. A. Edmunsen of Carstairs  
was a visitor in town during the  
first part of the week.

Rev. P. C. McCrae of Bassano  
visited here this week; the guest  
of Mr. and Mrs. Halliday.

Among the visitors in Crossfield  
over the week-end were, Mr. Wm.  
Stillwell and Mr. E. Olson of Red  
Deer.

Morgan Cressman of Didsbury  
had his Ruby wheat threshed out No. 4  
and yielding 30 bushels to the acre.  
—Didsbury Pioneer.

C. W. Donald, local Massey-  
Harris dealer reports the sale of a  
new 20 30 Wallis tractor and plow  
to McCaskill Bros.

Among the people who lost their  
cars during the recent fire were;  
Glen Williams, Howard Gazeley,  
and E. Springsteen.

Mr. and Mrs. E. Hays and son  
of Okotoks, were guests at the home  
of Mr. and Mrs. Mossop for a few  
days last week.

On Monday evening October 7,  
the Rev. Mr. Gardener of Calgary  
will give a lecture in the United  
Church illustrated by lantern slides.

On Sunday, Mr. and Mrs. A.  
W. Gordon had as their guests,  
Mr. and Mrs. G. Morrison and  
family and Mr. and Mrs. D. Mor-  
rison of Olds.

The Bannister Electric Co. y re-  
ports the sale of two more radios  
in this vicinity. Mr. J. Collins pur-  
chasing a Westinghouse and Mr. F.  
Mossop a table Victor.

The Inverlea Ladies Aid will  
hold a chicken supper followed by  
a programme on Friday, October  
25th, at Inverlea school. Every  
body welcome. Admission, Adults  
50 cents. Children 25c.

## Airdrie News

Mr Ellis Wagner who is farming  
8 miles east of Airdrie is holding  
an auction sale of his entire farm-  
ing equipment on Wednesday  
October 9th, commencing at 10  
o'clock. Mr Leslie Farr is conduct-  
ing the sale.

A number of local young men  
made a trip through the Peace  
River country; driving home  
Tuesday. They report a splendid  
journey and were impressed with  
the northern country.

Mrs Paul Allen entertained on  
October 2nd, in aid of the Ladies  
Association, collecting around  
\$13.00.

Fred Luetscher is building a  
new house, one of the finest in  
town and the only stucco dwelling  
house so far.

Preparations for repairing the  
local rink are in full swing and an  
8 foot board fence will be erected  
around it next week.

Mr Paul Allen, Ford salesman  
for the Farr Garage, conducted  
business in Crossfield this week.

This week we have mailed out  
subscription notices to subscribers of  
The Chronicle and we hope that  
everyone will respond at an early  
date. All subscriptions are due  
and payable at The Chronicle Office.

Send Us Your Printing, We  
can do it now without delay

**A FORTUNE IN IT**  
If you could place an ad in the  
Moon millions of people would read it.  
Even then it would only be valuable  
a few nights each month, whereas a  
Want Ad in this paper while more  
limited in its scope will cover this  
particular locality every day in the  
year.

## Personal Greeting Cards

We have just received a sample book containing the very  
latest designs in personal Christmas cards. Visit the Chronicle  
Office and inspect them.

The few dollars you spend on Greeting cards is probably  
the most wisely spent money of the year.

It solves your Christmas Gift proposition in an economical  
manner.

If it weren't for Christmas you could not greet your friends.

These samples are better than any competing line and the  
prices are the lowest in Canada.

See our "Golden Dollar Box" of ten assorted cards — a  
special value for your advantage.

Supposing no one took the trouble to send their Christ-  
mas wishes to you — it would be a dreary world.

The Crossfield Chronicle

## NEW MEAT MARKET OPENED TO SERVE YOU

Messrs Royer & Gazeley wish to announce to the public  
that they have opened an up-date shop in the premises  
west of the Bank of Commerce. There customers can  
rely on a square deal and courteous treatment.

ROYER & GAZELEY - Crossfield

## GMR Cylinder Head 58 h.p. BIG Six Engine Fuel Supply Pump

COMPARATIVE tests . . . made with the "fifth-  
wheel" speedometer . . . prove Pontiac to have  
the highest top speed and fastest acceleration of all  
cars in its price range. Its 200-cubic-inch engine  
delivers 58 brake horse-power at 3,000 r.p.m.,  
exceptional power at moderate engine speed spelling  
long life for Pontiac's Big Six engine.

High-compression performance, with ordinary fuels  
is provided by Pontiac's GMR cylinder-head,  
developed by General Motors Research Corporation  
and available in no other car at Pontiac price.  
Positive fuel-pump assures full supply of gas and  
prevents starving on long, steep hills.

The only true performance is all-round performance  
— power, speed, acceleration and LONG LIFE.  
That is why Pontiac is worth more today than other  
cars at its price. Compare Pontiac's BIG SIX  
beauty, performance and dependability with any-  
thing this price held can offer . . . then make your  
decision.
